

Introduction to Generative AI

A network diagram with glowing blue spheres connected by lines, set against a dark wooden floor background. The spheres are arranged in a complex, interconnected pattern, with some spheres in the foreground and others receding into the background. The lines connecting them are also glowing blue, creating a sense of depth and connectivity.

0. Course Introduction

Session Introduction

- Hours
 - 9:00 to 12:30
 - Fifteen minute break at 10:45
- Materials
 - Available at <https://github.com/ExgnosisClasses/2601-GenerativeAI-Sept9>
 - Available until at least October 9, 2026
- AI Tools
 - The use of AI tools will be demonstrated using ChatGPT, Copilot and Claude
 - If you have access to any of these, feel free to follow along with your own tool

Session Outline

- Module 1: Foundations of Generative AI
- Module 2: Prompt Engineering Fundamentals
- Module 3: Advanced Prompt Engineering Techniques
- Module 4: Applying AI in the Real World
- Module 5: The Future of AI and Generative AI

Instructor – Rod Davison

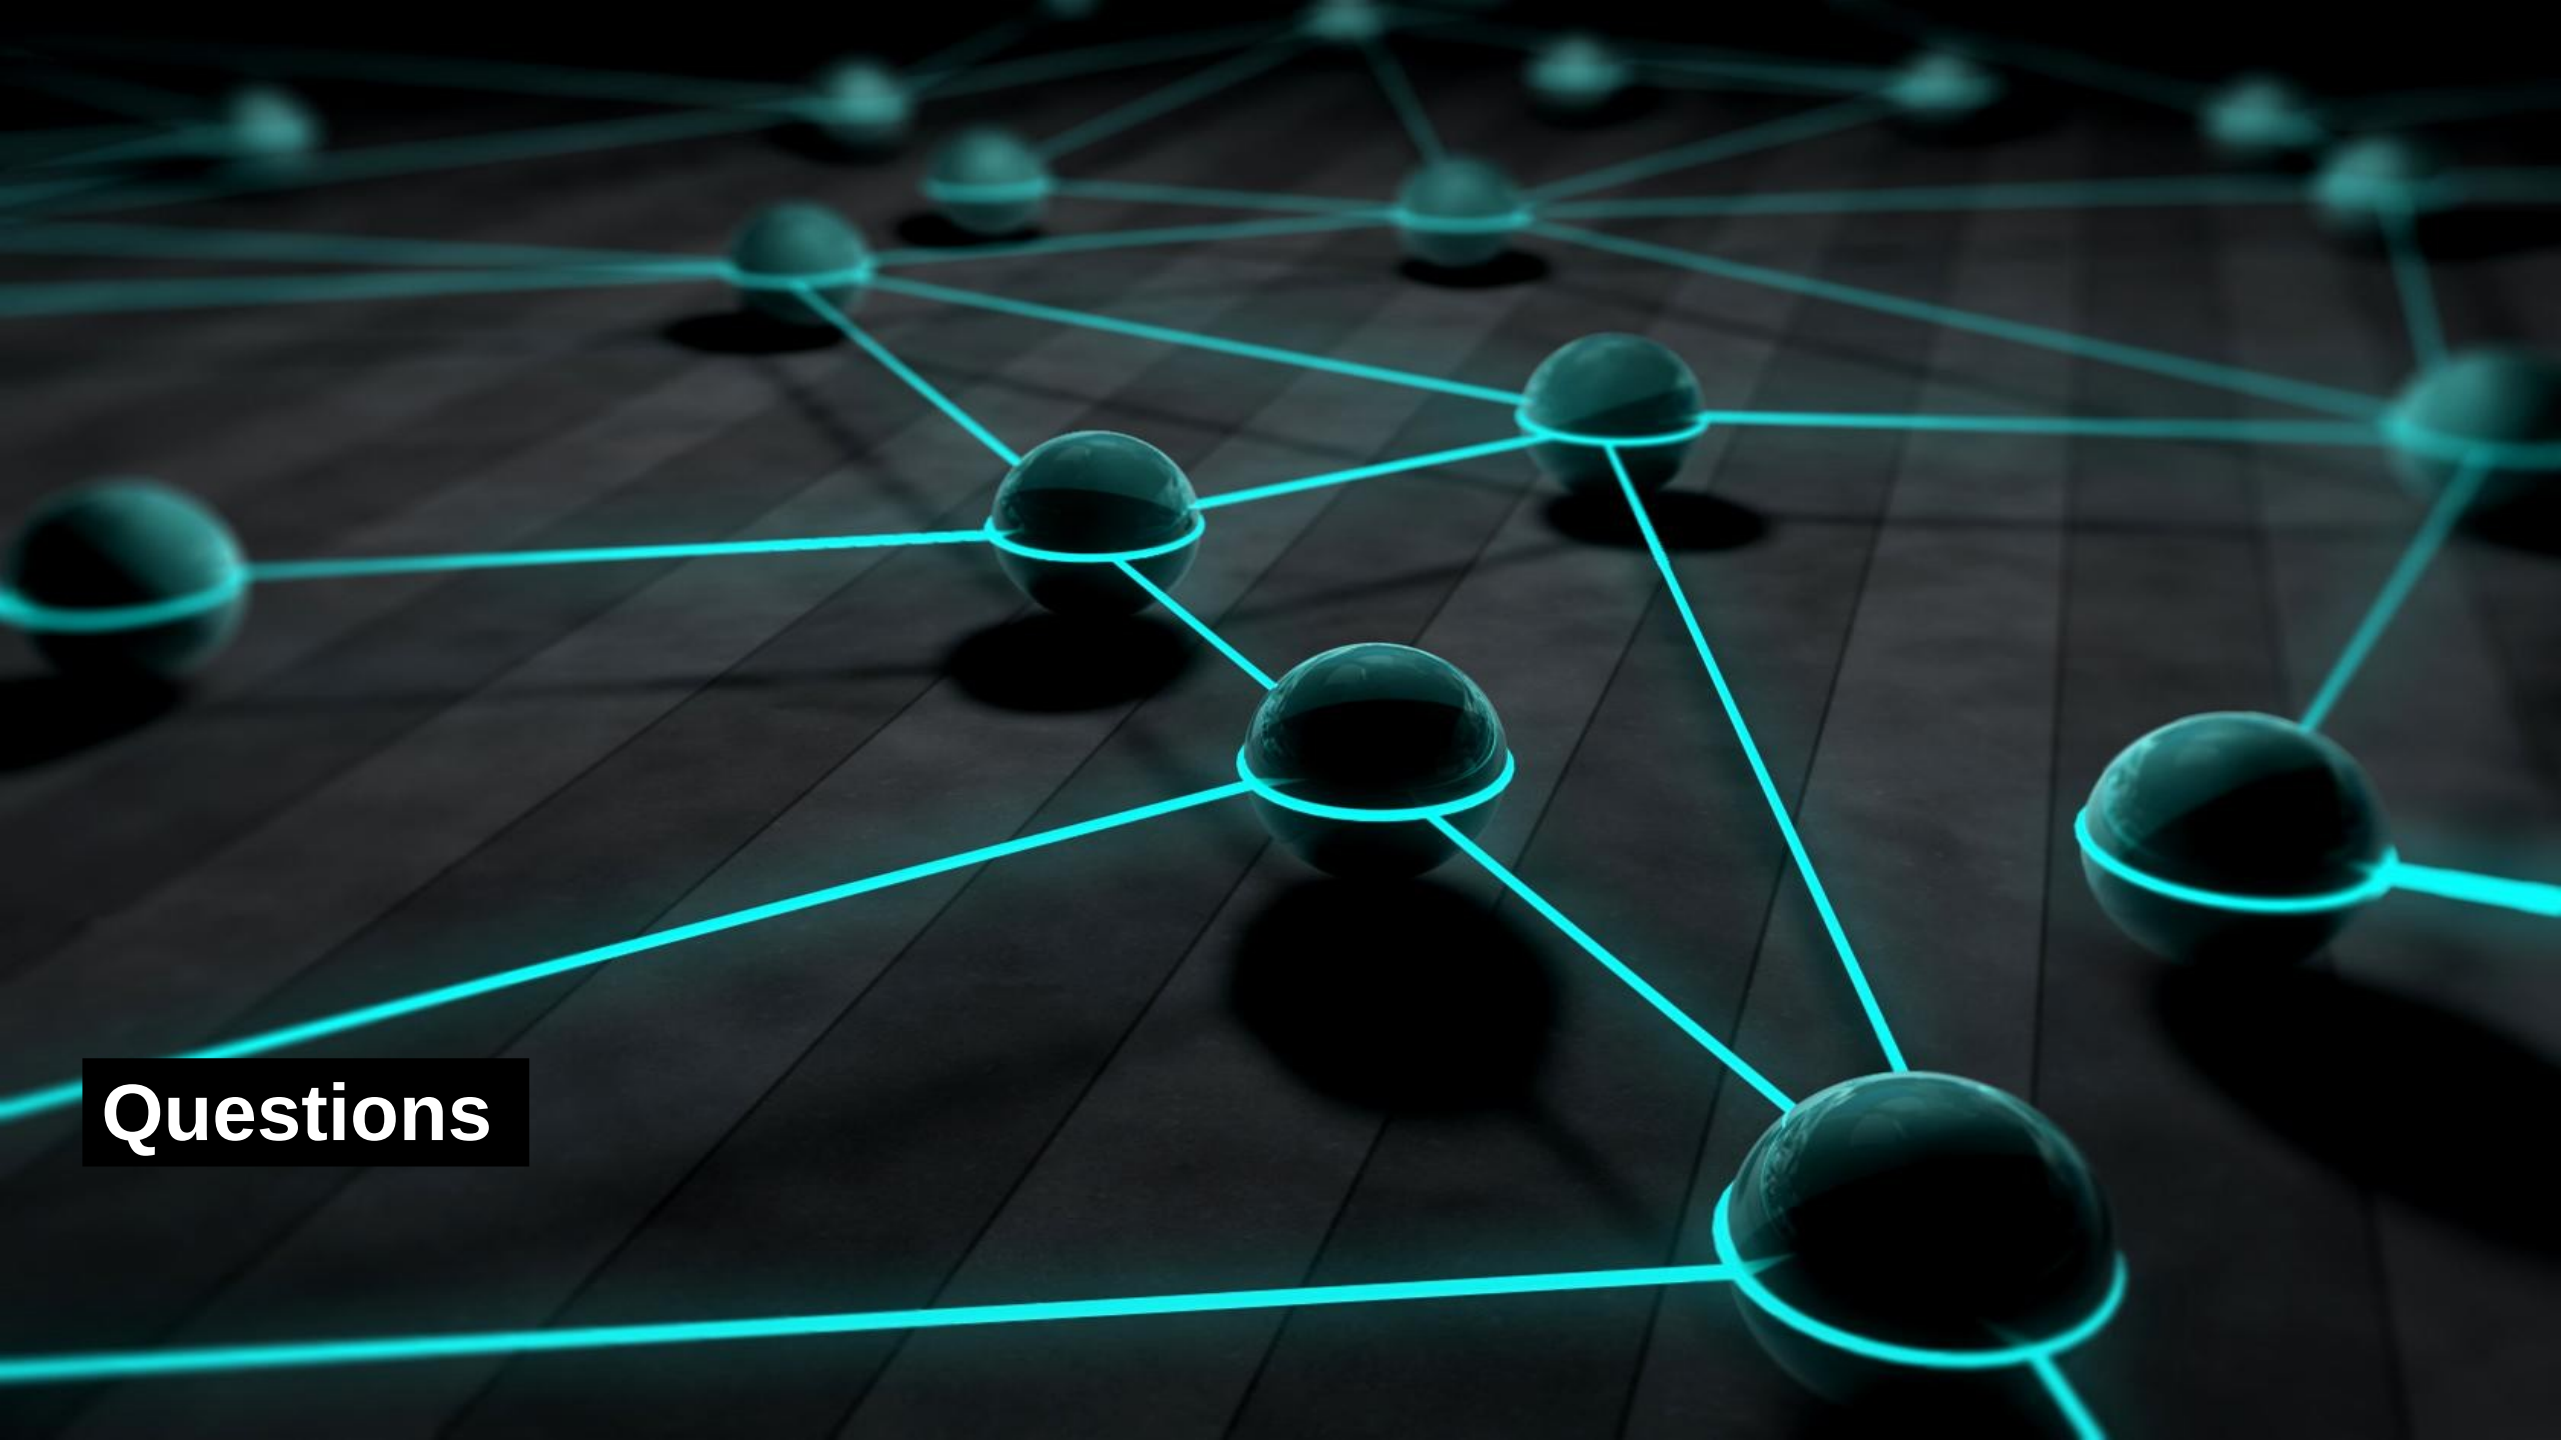

- 50+ years experience in IT
- 40+ years experience in AI
- Designed and developed AI prototypes
 - NLU, expert systems, machine translation, agents and more
 - Research director for AI companies
- Academic background
 - Theoretical math, psychology, anthropology, cognitive science
- Consulting
 - Finance, Defence, Insurance, Government, Fortune 100
- Currently doing research in emerging AI technologies

Introductions

- In order for me to ensure the class meets your needs
- Please introduce yourself and tell me:
 - Your professional background so I have a sense of what skill sets you are bringing to class
 - Your experience, if any, using AI and GAI
 - Any specific goals or objectives for the class

Questions
